Guillermo also came up with Lightroom Mobile Presets to match the desktop versions. These can be used in Lightroom CC, a free Lightroom CC App by including the .dng files included with the download of the Lightroom Mobile application.

The only thing you have to do is to unzip the file. Then, start your "Mobile Presets" folder on your smartphone. You can do this using an app such as Google Drive or Dropbox. Add that folder to the "Lightroom CC" App and you're done! ... you can take the Settings (Presets) from the images and then paste them to the images you wish to edit.. It's all only a matter of seconds on your phone.

Gfx plugin details of 15 Mobile + PC Lightroom Presets
