平面设计

Leverage the capabilities of cutting-edge algorithms to seamlessly remove skin imperfections and rejuvenate your skin's texture.

### Lighting

It is now possible to control the light on your subject with new features that are intuitive and extremely efficient and with a natural rendering.

### Makeup

A collection of tools to create realistic makeup in only one or two clicks. You can even correct tiny imperfections in your makeup, or give room for your imagination.

### The Mood End Extras

Revitalize your photos even in less-than-ideal lighting conditions with the cutting-edge features of the "atmosphere" section. Explore the exciting "mood" effects to infuse your images with personality. Craft precise tonal or luminance masks to enhance your creative vision. Then, expertly fine-tune sharpness and contrast to achieve professional-grade results.

### Principal Interface

Within these three segments lies a comprehensive toolkit for crafting expert-level portrait postproduction. Featuring diverse frequency separation techniques, advanced dodge and burn removal, blemish elimination, along with comprehensive lighting control and digital makeup, the scope of creative possibilities knows no bounds. You can personalize the interface by selecting your preferred language, ensuring that the toolbar provides unfailing access to all necessary tools for seamless progression. The notion of "impossible" becomes but a distant, unreliable memory.

### MOOD ATMOSPHERE, EXTRA

Craft a distinct and personalized touch to your artwork with these three sections. Choose from a plethora of moods to imbue your images with stunning hues, while experimenting with various tonings to either distort or accentuate the existing scene, enhancing its mood further. Replicate the blur effects of diverse lenses, and then put the finishing touches on your photograph with refined techniques to enhance clarity and sharpness.

### BRIGHTNESS and HUE MASK

With the editor, precision reigns as you tailor adjustments to match the scene's intensity. Seamlessly blend them with cool or warm tones, granting you the power to decide whether modifications should be confined to the lights, extend to midtones, or encompass shadows across 13 distinct brightness ranges. A handy preview function facilitates swift selection of the optimal mask, ensuring exact results in minimal time.
