

## IDERA Rapid SQL v18.5.0 Build 3433 for Win x64 + Keygen

2025-01-21 01:35:37    label 我要反馈    下载页面

IDERA Rapid SQL is a comprehensive, integrated development environment (IDE) tailored for relational databases, offering a unified platform for creating and managing high-performing SQL code across a range of major database platforms. With its intuitive visual query builder, developers can effortlessly construct complex SQL statements without extensive SQL knowledge, streamlining the development process. IDERA Rapid SQL provides essential features such as code assist, real-time syntax validation, and project-level cataloging, enabling developers to start coding immediately and maintain code quality throughout the development lifecycle.

The built-in SQL debugger simplifies error identification and correction for SQL Server, Oracle, Sybase, or Db2 stored procedures and functions, enhancing development efficiency. Collaborative development is facilitated through version control capabilities, allowing seamless integration with source code repositories and enabling team members to manage projects efficiently.

Additionally, supports advanced database management features, including Oracle-specific schema object types and SQL Server advanced object properties, ensuring compatibility and optimization across various database platforms. With its robust suite of tools, IDERA Rapid SQL empowers developers to create, optimize, and collaborate on SQL code effectively, ultimately enhancing productivity and software quality.

### Key Features of IDERA Rapid SQL :

1. Unified interface for developing SQL code across major database platforms
2. Visual query builder for constructing complex SQL statements with ease
3. SQL editor with code assist and syntax validation for efficient coding
4. Built-in debugger for identifying and correcting errors in SQL code
