

Aescripts – ReTrack v2.1.3 (WIN, MAC) for After Effects

2025-02-10 16:53:03 [label](#) [我要反馈](#) [下载页面](#)

It is a motion-tracking editor and engine. Use together all sorts of AE monitored data and re-track challenging shots just with selections. Adjust bad monitoring by functioning above monitored keyframes.

THE TRACK TOOL AND THE EDIT TOOL

Load all sorts of AE monitored data: 3D camera tracking solids, monitored masks, tracker tips, face tracking information, and Mocha information into Racetrack.

Draw temporary masks to the produced factors cloud to:

- Construct complex tracking with fundamental data that is tracked.
- Estimate and reconstruct missing paths.
- Racetrack offscreen targets. Points collections allow dependable and exact tracking.

Output to masks, corner hooks, transform information and tracker points, nulls.

Select and edit monitored data together with the Edit tool. It empowers a digital keyframing system that operates over the monitored keyframes. The Edit tool allows you to refine and adjust monitored objects very fast, without needing to change every monitored keyframe. It supports masks, corner hooks, tracker factors, mocha effect monitoring information, layers change attributes, and any chosen impacts on 2D possessions

WHAT'S NEW IN V2

- Automobile darkening semi-monitored data.
- UI helpers controllers.
- Merge monitored data straight.
- Keys established edit instrument using trimmed and altered layers support.
- Perspective monitored masks assistance.
- Move 3D Camera movement to 3D nulls.

New Changes:

- Better tracking when four tracking data points are used.
- retract solid pixel aspect ratio matches comp aspect ratio.
- fixed: in some cases the script stop working when loading masks data.
- fixed issue: 3D nulls output don't generate tracked 3D nulls.
- the Edit tool now also works with the AE Corner Pin effect (user request).
- fixed issue: effects selected properties data are not loaded.
- fixed: tracking does not work when running not the English version of After Effects.
- fixed: the script stop working when the auto rebuild is applied to mask tracked in perspective/skew mode.
- fixed: in some cases, the script can't load tracked data.
- fixed: in some cases the script stop working when retracting.
- fixed issue: edit mask tool stop working after the first edit
