Ultimate Duotone Master Kit

2025-02-10 17:11:44　　label 我要反馈　　下载页面

The Ultimate Duotone Master Kit includes 45 Duotone Effects, 45 Bonus elements, and a Preview Builder.

45 Duotone Effects' well-curated set of effects will save your time by allowing you to select only the colors that are compatible. An experienced designer doesn't have the time to go through thousands or hundreds of possible actions. This well-crafted bundle includes everything you need, and it's very easy to alter and modify the color scheme to suit your preferences easily.

BONUS: 45 Vibrant and abstract elements: Match the shapes by shape and color and design your individual scenes. These can do wonders for poster design, web design as well as social media posts and apps and are great when combined with photos and typography. Due to their light colors, they don't overpower the design, but instead, highlight the important elements while also making them playful with the modern design.

Preview Builder Replace the photo inside the smart object on your own and watch the magic take place. You'll see a preview of how the image will appear when the action is applied in a single. This can make it easier to spend less time in choosing which duotone best suits your image and improves the efficiency of your work.

This action was tested and worked in Photoshop CS3, CS4, CS5, CS6, CC and CC, and higher. There are no additional plugins needed.
