

## Aescripts Block Swap v1.5.1 (Win, Mac-v1.5.0)

2025-02-10 16:44:47 [label](#) [我要反馈](#) [下载页面](#)

Randomly shuffles picture cubes. Perfect for clean-looking Sound Consequences, blocky glitches as well as alterations.

### How it works

Blocks of this origin Picture are only swapped between every other. Their size, disperse, count along with other parameters could be manipulated and revived.

## Gfx plugin details of Aescripts Block Swap v1.5.1 (Win, Mac-v1.5.0)

The product is in the **After Effects Plugins category from AeScripts**; for more information about this post, you can click on the home page link in the sidebar.

To search for similar products to Aescripts Block Swap v1.5.0 (WIN, MAC),

**Does this product work on Windows and Mac Os?** We mostly include the operating system in the title. If it is not written, it will work on Windows, and you can [check](#) for the Mac version.

### Available parameters rundown

**Channels** Enable you To define which color channels if the impact is implemented to:

RGBA - that the Result is Applied to all stations evenly

Red, blue, green, and Alpha - the result is applied only to the chosen channel

**Block Width** Specifies the diameter of the blocks which ought to be swapped - that the values go from 1 (this creates noise-like impact ) around 1024 (big tiles)

**Block Height** Specifies the elevation of these cubes

**Shuffle Power** - The proportion of blocks that needs to be swapped. 0 - all the cubes stay in their original location; 1 - all the cubes are swapped.

**Shuffle Spread** - the best way is Far apart if the trimming occurs. 0 - swaps just the neighboring cubes; 1 - swaps blocks the furthest apart.

**Shuffle Spread Management** decides the axis where trimming happens:

- Horizontal - cubes Are transferred just in their pops
- Vertical - cubes Are transferred just in their columns
- Both - cubes are Swapped everywhere in the picture

**Random Seed** sets the Order that is used for trimming. Animate this to transfer blocks around occasionally.

### New Changes:

- Time Shift (new section) - allows shifting of blocks in time
- Mask Filter (new section) - controls the occurrence of swap operation only in certain areas
- Composite on Original - allows outputting only changed areas of the image
- Block width and height size limit extended to 4096
- Universal macOS binary (Apple silicon support) for Premiere Pro and After Effects (beta)
- Multi-frame rendering support
