Ableton Glitch and Wash 1.2: Glitch And Wash explore the contrast between organic textures and precise beats. This Pack blends precise slices and tiny snippets in sound with warm ambiance pads, textures, and soundscapes prepared to be tweaked with a lot of force.

The product was developed through Ableton with sound engineers like Sonic Faction, Michele Darling, and Mindflux. This carefully curated collection contains everything required to make tracks together in one spot. Drum Racks come with little-crushed kicks, static-soaked clicks, and smooth percussion making it possible to create modern soundscapes that don't hinder your imagination. A variety of Instrument Racks provides resonant soundscapes, changing beds of sound, and many more.

There are also over 200 audio loops and MIDI clips that include drones, chopped drum breaks, and field recordings that are carefully chosen to stimulate your imagination and kickstart your tracks. Bring life and clarity to your music production.

The Pack is designed with Packpark ideas and keeps you on track. Eight Macros are carefully set up for creative tweaking and sound design for each instrument—especially from Push. Utilize the effects chains included in the Drum kits and Instrument Racks to change your low-end from large and loud to focused and precise and more.

Pack includes:

- 180+ Instrument Racks
- 25 Drum Racks
- 200+ audio loops as well as MIDI clips
- 19 Effect Racks
