Terrain Builder Pro - AE Project VH-20788566: Terrain Builder After Effects template can be used to create complex paths and trajectories on 3D Terrain. It's completely customizable and simple to use. No third-party plugins are required. The project was created in After Effects CS5.5+. To create 3D terrain, you only need 2 images (Height and Color maps). Project automatically generates 3d Terrain. You can download the base icon set for free. You can also use your own icons. Multiple helper layers give you complete control over all the main properties. Everything can be modified in a non-linear workflow because the project has a modular structure. It is easy to add any element on the map (footage or photo, video, or composition). It is now possible to create complex 3D scenes much faster and easier than ever before.

- Project fully customizable
- Non-linear workflow
- Modular structure
- Base icon set free of charge
- You can create any complexity path.
- Animation controls are very simple.
- No plug-ins required
- Any resolution
- It is very easy to modify any property
- CS 5.5 or higher
