Unreal engine - Kick Up FX v4.27: Introducing a dynamic FX pack designed to elevate the visual experience of cars driving on different surfaces. This comprehensive package features 10 Kick-up Niagara effects, meticulously crafted to simulate various surface types encountered during driving scenarios. Each effect is tailored to offer authenticity and realism in diverse environments, from Concrete to Dirt, Dusty to Grass, Gravel to Mud, Sand to Snow, and Tarmac to Water.

With two emitters and 10 Niagara systems, this FX pack offers various visual effects to enhance your game environments. User parameters are provided for easy customization, allowing you to seamlessly fine-tune the effects to match your specific preferences and requirements. Utilizing GPU emitters ensures efficient performance while implementing Level of Detail (LODs) optimizes performance across different platforms.

This pack comprises eight materials and one instance, providing flexibility and versatility in visual customization. Additionally, 20 textures are included to add detail and immersion to each effect. Whether you're developing on Windows or Mac platforms, this FX pack is fully supported, ensuring accessibility for developers across different operating systems.

Immerse players in the dynamic and realistic driving world with this FX pack, which enhances the visual experience across various surface types. Whether navigating through rugged terrain or cruising along smooth roads, these effects add depth and realism to your game environments, enhancing player engagement and immersion.
