HUD – UI Tracking Screens - AE Project VH-36190487: The HUD as well as the User Interface Template Pack for TV, Film, and Games. Featuring Tracking UI designs. The perfect screen replacements for any project that needs futuristic sci-fi style screen windows for movie commercials, TV series, and gaming, futuristic company presentations, or for businesses in the entertainment business. Put designs on any screens, tablets smartphones, computers, tablet screens, and projections on TV monitors or any other futuristic display system.

Interfaces have a myriad of elements such as globe or world map, GPS tracking graphics, codes, tables of data city blocks in 3D, street renders and wireframes relief, maps of terrain CCTV screens callouts, pointers, etc. A majority of the elements are looped and come with an initial animation to reveal.

Screens are designed entirely using After Effects using only AE Shape Layers. They feature 16 pre-rendered 3D elements explicitly designed to be used in this Project.

- 16 User Interface [User Interface Screens
- 4K Design Resolution [16x9]
- 16 Pre-Rendered Elements
- Resizable Shapes of AE
- It works With All AE Languages
- Video Tutorial Available
- No plugins are required
