DVLOP – India Earl – Honey Presets

2025-02-10 17:15:14　　label 我要反馈　　下载页面

SOFTWARE SUPPORTED

- Adobe(r) Lightroom(r) 4, or later (Classic)
- Adobe(r) Camera Raw CS6 or later
- Adobe(r) Lightroom(r) Lightroom(r) CC desktop 1.4 or later, and Mobile (Non-Classic)

Note: Honey was designed for Lightroom CC Classic. Some modifiers may not work for LR CC Desktop and Mobile.

Honey was designed to keep the photographer's workflow and creative ideas in mind. It was created to not just imitate India's editing style but also to assist you in identifying and developing your own style and be deliberate rather than leaving the preset to take care of the job. It has golden tones of honey, soft whites, vibrant colors, and dark shadows. The design was developed to focus on skin tones while balancing the tones with different lighting conditions. Educational materials, like streaming videos as well as in-depth PDFs, are available so you can observe what India alters her photographs along with hundreds of other photos submitted by photographers from around the world.
