Unity Asset - Easy AR - Make Awesome AR Apps Without Coding v3.0: Easy AR simplifies the creation of Augmented Reality (AR) apps by providing a user-friendly platform that requires no coding. Easy AR handles it all effortlessly, from object placement to gesture controls and automatic lighting.

Compatibility:

- Recommended Unity version: 2020.2.4f1 or above
- AR Foundation package: 4.1.7
- ARCore XR Plugin: 4.1.7
- ARKit XR Plugin: 4.1.7

Description: Easy AR streamlines the development process for AR apps, making it quick and intuitive without coding. It's compatible with both Android and iOS platforms. With Easy AR, there's no need to configure AR Foundation settings for optimal performance. Add your 3D prefabs and start building. Easy AR also offers flexibility for those who want to customize scripts.

- Automatic vertical object spawning and controls (e.g., Clock, Painting)
- Automatic horizontal object spawning and controls (e.g., Chair, Table)
- Multiple object spawning and controls
- AR Configurator
- AR Measurement
- AR Floor Tiling
- AR Face Filters
- AR Image Tracking
- AR Portal
- Automatic dynamic lighting and reflections
- AR Occlusion feature
- Tools for baking contact shadows for objects
- No coding required
