

HyGear – Replica TopGear FCPX Transitions

2025-02-10 16:44:02 label 我要反馈 下载页面

HyGear – Replica TopGear FCPX Transitions: HyGear is a collection of 22 cool transitions designed for FCPX, which replicate the style employed by The BBC TopGear program editors. The transitions in this set replicate those featured in series 17 and 18 of the program from 2011 and 2012.

This was created exclusively from unique and fresh artwork. You can drag and drop them on your timeline to instantly have the same style as TopGear editors.

The image above was taken in two hours on a flat gray day. Think about what the edits appear like when the lighting is excellent, and you can spend lots of time capturing those fantastic images and (more important) get that back end to hang in the air...

Bespoke Artwork

The majority of Transitions like these are stand-alone artworks and are created uniquely.

Easy to use

Most of these effects require you to use them without altering their durations to achieve the maximum effects. Four of the effects are adjustable and can be altered or extended to work with the edit you are making.

Each icon represents the variable or fixed type of transition shown and the number of frames every transition can be programmed.

Drag it and drop it on your edit, automatically defaulting to the proper duration. If the transition is not constant, it can be altered later. Experiment with different effects!
