Requirements

- Adobe Illustrator (any Version)
- Adobe Photoshop (any version)
- If you're not familiar with Illustrator and Photoshop Basics then there won't be problems taking this course. But, I will help you when is required.

In this chapter, I designed the Packaging for Products & Labels from a **contest-based website**. I took an example from 99design.

If you're looking to maximize your earnings as a graphic designer, this course can help you increase to your earnings.

It will help you through and provide you with professional-level skills regarding Product Packaging and Labels.

This is your chance to not only learn how to create a range of mockups using Photoshop but also to learn how you can make money selling these templates.

What's included?

In this class, you'll be taught how to make five different types and mockups:

- Chips Bag Label
- Shopping Bag Label
- Cosmetic Tube Label
- Plastic Pouch Label
- Paper Cup Label

In each of the projects, you'll follow the process by selecting the best image and then putting the final elements of the template.

Who is this course intended for:

- Anyone who wants to create Product Packaging & Labels for their products and wish to print them.
- Everyone who would like to become a graphic designer.
- This course is designed for graphic designers as well as aspiring graphic designers looking to master a crucial ability to increase the amount of money they earn.
- Are you looking to take your design abilities to the next level?
