Blender - Nview V3: Camera-Based Scene Optimization v3.6.2: nView V3 is a Blender add-on focused on optimizing scenes by managing camera visibility, improving viewport speed, and reducing rendering time.

How to optimize the scenes by focusing on the camera view?

You can use "Nview V3: Camera-Based Scene Optimization" in Blender.

This tool identifies and hides objects unseen by the camera, enhancing workflow efficiency.

Compatible with all render engines and object types, nView offers features like object visibility keyframe baking, geometry masking, and optimizing geometry nodes.

New changes include updated tooltips, fixed issues with error messages, and customizable preferences for enhanced usability.

Overall, nView provides a comprehensive solution for scene optimization in Blender, ensuring performance and visual integrity.
