Throughout this course, you will:

- Explore the theory of creating engaging 2D game background designs.
- Learn to use Inkscape for vector game art.
- Create four distinct parallax-ready game backgrounds: a simple yet fiery desert, a galactic backdrop for a vertical space shooter, a bustling cityscape with skyscrapers, and my personal favorite, a magical forest scene!

Follow along in this background design course, create these 2D game assets with me, and craft your versions to share with the community. Improve, practice, experiment, and design the backgrounds your game truly deserves! Please note that this is not a beginner Inkscape course. While you'll gain insights into Inkscape, vector design, and background design, I won't cover all the essential tools. If you need to learn those, check out my beginner courses :)

Who this course is for:

- Indie game developers aim to create their game art.
- Designers looking to delve into 2D game art design.

What you'll learn:

- The theory behind creating engaging 2D game background designs.
- Effective use of Inkscape for vector game art.
- Creation of four parallax-ready game backgrounds.
- Ability to craft your unique game assets in vector using a free tool!
