Beyond the basics, include the following tools:

- Path Rotation fix
- Path delay and Elastic animations work better with motion on parent layers
- Disabled elastic animation by default
- In some cases script adds an unnecessary key to the slider rig
- Fixed and improved state morphing
- Added possibility to change each path controls when the value randomizer is disabled.
- Disabled random wave speed frequency and amplitude values
- Unparent layer before resetting layer
- Disable expressions before deleting them in smart mode
- Remove all round corners that were added by Crazy Shapes
- add keys to the selected path on the viewport
- Reset the position, rotation, and scale within the layers of the shapes, which includes the coordinates of the path space.
- Link Nulls with Path points to five ways.
- All parametric shapes can be converted into keyframes or to convert entire expressions into keyframes using one button.
- Remove the appearance of unneeded inner groups of forms.

New Changes:

- Path Keys: reveal the path properties with keyframes
- Slider Path: incorrect Null moving direction
- **Convert To Path:**
- improve Convert to Path Mechanics
- this functionality is added to the Nulls & Points Linking functions and is applied automatically
- **Slider Rig:**
- remove unused Layer Scale and Layer Rotation properties,
- fix slider pseudo effect instead of Len Rig effect
- Code optimization and small improvements
