Lightroom　　平面设计

Takahiro Sakai's original pre-set was created, which is a great way to capture the amazing moment of the models. It is well-known for its soft light and clear photos.

It is clear that using this preset will improve the visibility of the model's hair and skin and create a gorgeous. It is an old-fashioned film tone and is a set of presets designed to capture scenes such as clouds and sunny days. I'd like to modify photos that look stunning and complement models like Takahiro Sakai, however, I'm sure there are many who don't know how to edit them.

Gfx plugin details of Curbon – Takahiro Sakai [Portrait Collection]

The product is in the **Lightroom category**, for more information about this post you can click on the home page link in the sidebar.

01 Nostalgic and Clear

This preset seeks to mix the nostalgic feel of film photography and sharp transparent digital images.

I am aware of the beauty of the gradation that the midfield of film.

Particularly for portraits, I altered the skin so that transparency texture, color, and transparency are easily visible.

Additionally, I attempt to convey a nostalgic feel as well as bring vibrant colors to the photos which depict the landscape.

There tends to be a tendency for shades to appear slightly warmer in general, so you should modify the WB based on the image.

02 Clear and Cloudy

This preset is suggested for use in shooting with clouds, as it allows you to produce vivid colors and clear skin outdoors, during cloudy days.

While it's an image with a cloudy appearance that tends to be smooth and uncolored and is difficult to colorize, however, it's made to create a striking contrast.

As well as the cloudy days, it's also beneficial to whiten the skin and finalize photos using clear shadows and light.

03 Emerald green

It's preset which finishes with a different color, using blue-green as the main color.

Colors that lie somewhere between reality and illusion produce stunning photographs.

In portrait photography, I was aware of finishing with smooth hair and skin.

The suggestion is to make the amount of exposure slightly higher to make it easier to create vibrant shades.

04 Emotional Sunset

This preset is ideal for photography at sunset, making the photo of the sunset more emotional. The hue of the sun's setting is set to be vibrant. Additionally, it's set to create a small blur and graininess in order to show the impression of a fading Sunset time zone.

You can recreate the warm hues of the sun's setting by altering the WB to a slightly warmer hue.

2005 Brilliant Light

This is a great preset to use when you wish to capture a photo in the sun or create an impression of sunlight.

It's a setting that provides contrast to images with backlight which tend to create a flat appearance because of too much light passing through.

In contrast, the lighting is designed to create a powerful and glowing impression.

The final look of the product will vary based on the direction the light comes into and the brightness of the light so make sure to adjust the shadows and highlights prior to making use of it.
