

Blender - Fluid Painter 1.3.21

2025-02-10 16:52:03 [label](#) [我要反馈](#) [下载页面](#)

Blender - Fluid Painter 1.3.21 is a groundbreaking Blender Add-on designed to revolutionize fluid painting within 3D designs, offering a seamless and intuitive workflow. Developed out of a personal need for simpler fluid painting methods, this tool eliminates complex interfaces and delivers a powerful, flexible solution for artists.

How to display liquid coloring on surfaces in 3D designs?

You can use "Fluid Painter" in Blender.

Key features of Blender - Fluid Painter include:

- Versatile Painting:** Utilize Geometry Nodes to effortlessly paint static fluids onto any 3D surface using curves, with customizable base and advanced parameters.
- User-Friendly Interface:** Access a collection of 30+ presets for quick and stunning fluid effects, compatible with both Eevee and Cycles rendering engines.
- Drop System:** Employ an intuitive drop system to generate and manipulate drops along fluid curves, adjusting size, length, and position to create dynamic flow effects.
- Scattering Objects:** Enhance realism by incorporating scattering objects like spheres or cylinders onto fluid surfaces, simulating elements such as air bubbles or textures.
- Advanced Parameters:** Fluid+ presets offer special settings for creating adaptive flat fluids that seamlessly conform to drawing surfaces.
- Export Capability:** Easily export fluid creations as meshes for compatibility with other 3D software, enabling seamless integration into diverse projects.
- Custom Fluid Creation:** Unleash creativity by building fluids from scratch using default presets, providing limitless possibilities for fluid design in Blender projects.

"Blender - Fluid Painter" Samples:

Fluid Painter redefines fluid painting in Blender, catering to both novice and experienced artists seeking efficient and dynamic fluid effects within their 3D designs.
