

## CData Drivers for Zoho Books v24.0.9111 (11 Dec 2024) All Platforms + License Key

2024-12-18 23:03:15   [label](#)   [我要反馈](#)   [下载页面](#)

**CData Drivers for Zoho Books** facilitate seamless Zoho Books account data integration across various platforms, including BI, Reporting, Analytics, ETL Tools, and Custom Solutions. With easy-to-use connectors, organizations can effortlessly access live Zoho Books data from anywhere, empowering them with real-time insights and analytics to drive informed decision-making.

offer unparalleled query performance and comprehensive access to Zoho Books data and metadata, seamlessly integrating with preferred analytics tools. This ensures swift connectivity for BI, analytics, reporting, and data visualization technologies, enabling organizations to derive maximum value from their Zoho Books data.

Furthermore, **CData Drivers for Zoho Books** extend beyond mere connectivity, offering robust, reliable, and secure data movement capabilities for ETL, replication, and warehousing tasks. By supporting popular database protocols and interfaces, managing Zoho Books data becomes effortless, facilitating operational reporting, query optimization, and data governance initiatives. With streamlined workflow and automation, developers can build higher-quality applications faster, leveraging a data-centric model that simplifies integration and enhances overall productivity.

**This package includes the following components:**

- Excel Add-In for Zoho Books
- Zoho Books ADO.NET Provider
- Zoho Books BizTalk Adapter

- Zoho Books Data Cmdlets
- Zoho Books FireDAC Components
- Zoho Books JDBC Driver
- Zoho Books MuleSoft Connector
- Zoho Books ODBC Driver
- Zoho Books Power BI Connector
- Zoho Books SSIS Components
- Zoho Books Tableau Connector

## Key Features of CData Drivers for Zoho Books :

1. Seamless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
2. Real-time access to Zoho Books data from various applications
3. Unmatched query performance and comprehensive access to Zoho Books data and metadata
4. Robust, reliable, and secure data movement for ETL, replication, and warehousing
5. Optimization of operational reporting, query performance, and data governance initiatives
6. Support for popular database protocols and wire-protocol interfaces
7. Streamlined connectivity with workflow and automation tools
8. Simplified integration for developers, enabling faster application development
9. Virtual database abstraction layer for Zoho Books data with advanced data virtualization features
