

## CData Drivers for Salesforce v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:02:30   [label](#)   [我要反馈](#)   [下载页面](#)

**CData Drivers for Salesforce** provide seamless connectivity and data integration capabilities, enabling easy access to Salesforce data from a variety of applications. These drivers simplify the process of connecting Salesforce data with BI, reporting, analytics, ETL tools, and custom solutions, facilitating smoother workflows and enhanced decision-making processes. With fast query performance and comprehensive access to both data and metadata, they ensure efficient integration with analytics tools, enabling organizations to derive valuable insights from their Salesforce data.

In addition to BI and analytics, **CData Drivers for Salesforce** extend the functionality of ETL tools, offering robust, reliable, and secure data movement capabilities. They facilitate integration with relational databases and data warehouses, supporting operational reporting, query offloading, data governance initiatives, disaster recovery, and more. By supporting popular database protocols like ODBC, JDBC, and ADO.NET, they enable seamless connection to Salesforce data from a wide range of database management applications.

Furthermore, streamline integration with workflow automation tools, developer technologies, and data virtualization platforms. They provide flexibility and ease of use across various environments, allowing developers to build higher quality applications faster than ever before. With advanced features such as query federation and predicate pushdown, these drivers offer a data-centric model for Salesforce integration, simplifying the integration process and empowering organizations to leverage their Salesforce data effectively.

**This package includes the following components:**

- Excel Add-In for Salesforce

 **100% Virus FREE and Safe**

- Salesforce ADO.NET Provider
- Salesforce BizTalk Adapter
- Salesforce Data Cmdlets
- Salesforce FireDAC Components
- Salesforce JDBC Driver
- Salesforce MuleSoft Connector
- Salesforce ODBC Driver
- Salesforce Power BI Connector
- Salesforce SSIS Components
- Salesforce Tableau Connector

## Key Features of CData Drivers for Salesforce :

1. Seamless connectivity and bi-directional data integration with Salesforce
2. Integration with BI, reporting, analytics, ETL tools, and custom solutions
3. Fast query performance and comprehensive access to Salesforce data and metadata
4. Robust, reliable, and secure data movement capabilities for ETL, replication, and warehousing
5. Support for popular database protocols like ODBC, JDBC, and ADO.NET
6. Integration with workflow automation tools, developer technologies, and data virtualization platforms
7. Simplified integration process, enabling developers to build higher quality applications faster
8. Advanced features such as query federation and predicate pushdown for efficient data management
9. Flexibility and ease of use across various environments and applications
