Blender Market - One-Click Puddle Pro:

One-Click Physical Puddles Pro is a cutting-edge Blender addon designed to simplify the creation of wet scenes with unprecedented realism.

By transforming dry materials into dynamic, puddle-laden surfaces with a single click, this tool streamlines the workflow for artists while offering extensive customization options. From procedurally generated rain splashes and ripple effects to advanced PBR displacement techniques, this addon is perfect for creating immersive environments for films, games, and virtual simulations.

- **One-Click Wet Surface Creation:** Instantly transform materials into wet, puddle-covered surfaces with realistic physical properties.
- **Customizable Puddle Dynamics:** Adjust puddle size, depth, spread, and ripple effects for tailored results.
- **Procedural Collision Ripples:** Automatically generate ripples around intersecting objects, enhancing realism in dynamic scenes.
- **Procedural Rain Splashes:** Create realistic, real-time rain splash effects with customizable size, intensity, and distribution.
- **Advanced PBR Materials with Displacement (Pro):** Leverage state-of-the-art algorithms for enhancing PBR materials with dynamic displacement effects.
- **Draw Puddles (Pro):** Manually craft puddles using precision drawing tools via the vertex paint method.
- **Proximity-Based Puddle Generation (Pro):** Automatically generate puddles around terrain features or objects with adjustable placement using premade curves.
- **Procedural Rain System (Pro):** Generate cohesive rain effects that interact seamlessly with the environment.
- **Procedural Drips Shader (Pro):** Enhance wet surfaces with procedurally generated water drips and trails.
- **Simulated Water Physics (Experimental/Pro):** Add realistic water behavior to surfaces using SimNodes for dynamic simulations.
- **Water Flow Direction Painting (Pro):** Use brush tools to control water flow based on terrain slopes and contours, compatible with the Flowmap Painter addon.
