ivcam v7.4.2

2026-09-27 21:57:20

What is iVCam?

iVCam is a powerful webcam application that turns your smartphone or tablet into a high-definition webcam for your Windows PC. Instead of buying an expensive dedicated webcam, iVCam lets you leverage the superior camera quality of your iPhone or Android device to enhance your video calls, live streams, and content creation.

- Compatible with all major video conferencing apps including Zoom, Microsoft Teams, Google Meet, Skype, Discord, and more
- Supports both wireless connection via Wi-Fi and wired connection via USB cable for maximum stability
- Works with streaming software like OBS Studio, XSplit, and vMix for professional broadcasting
- Enables advanced camera features unavailable on standard webcams, including manual focus, exposure control, and white balance adjustment
- Allows multiple phone cameras to connect to one PC simultaneously for multi-angle streaming setups
