HyperSnap 9.5.1: HyperSnap 9 is a versatile screen capture and image editing tool designed exclusively for Windows users. Seamlessly combining the functionalities of a top-tier screen capture application with advanced image editing features and text capture through OCR (Optical Character Recognition), HyperSnap 9 offers users an easy-to-use solution for a wide range of tasks.

How can we get screen capture feature combined with Optical Character Recognition?

You can use "HyperSnap."

Users can effortlessly capture screenshots, extract editable text from images or the screen, and perform detailed image editing tasks, all within a single intuitive interface. Whether creating help documentation, online tutorials, manuals, presentations, marketing materials, or simply sharing visual content, HyperSnap 9 provides a fast and efficient means to capture and manipulate screen content with precision and ease.

"HyperSnap" Samples:

Furthermore, the OCR functionality, powered by the renowned Tesseract OCR project, is fully accessible in the free evaluation version, allowing users to experience its capabilities without limitations. HyperSnap 9 stands as a comprehensive tool for users seeking to produce polished and professional visual content from their Windows environment.
