

Quest Software ApexSQL Unit Test v2019.02.0179 + Keygen

2024-12-18 23:01:45 label 我要反馈 下载页面

ApexSQL Unit Test is a SQL Server Management Studio add-in that allows you to manage and run SQL Unit tests for SQL databases. It allows you to build unit tests and arrange them into test classes. Additionally, the test case can be run along with the entire tests of one class or the entire tests for one database in one click. The execution of tests can be controlled with the CLI and exporting test results in the XML file.

Quest Software ApexSQL Unit Test Great Features:

- Integrate SQL unit testing directly into SSMS
- Install and manage tSQLt from multiple sources
- Create and organize test classes
- Automate test execution using the CLI
- Create and organize unit tests
- Write tests using T-SQL
- Run tests with a single click
- Manage all tests with a single form
