Where can I download the product?

After subscription, You can download it for free from here.

The After Effects CC: Make Professional Titles Course for Lower Thirds!

Making lower thirds titles part of an edit can increase the quality of the film, however creating high-quality lower thirds that are animated with many layers is extremely difficult to accomplish in programs such as Premiere Pro, or other editing software. Using masking techniques in Adobe After Effects can create stunning, high-quality titles that will elevate the editing of your videos to the highest step. You'll learn the techniques that are used in commercials for broadcast television and big internet content that is budget-friendly.

This course will begin by going through the fundamentals in After Effects to get you up to speed, which will include an overview of the different panel windows as well as instructions on how to design elementary lower-thirds graphics that will teach you the basics. Then, over the course of several lessons, we'll take you through the process of creating two more professional and vibrant visual lower thirds titles employing two different techniques.

You'll be taught what to do:

- Create professional titles for lower thirds with After Effects CC
- Export your lower thirds that you have finished using an alpha channel so that you can overlay your rendered title so that you can watch the footage below
- Create and manage the text layer, solid layers masks, shape layers, and much more.
- Create keyframes that can be animated to create a modern look, dynamic motion graphic titles
- Techniques for masking to conceal and expose layers
- How do you create HD and 4K compositions, as well as export them

The instructor for this course is Will Bartlett. He has used After Effects since 2006 for commercials, feature films, and animation creative projects. He is the co-founder of a well-established video production company located in Toronto Canada and has been the Visual Effects Supervisor as well as lead Visual Effects artist for hundreds of films, feature films as well as television commercials.

If you're an absolute beginner with After Effects you will be able to follow the course and learn to make professionally-looking titles. However, if you're trying to master additional techniques and functions in After Effects, you should go to our second course, "After Effects CC: For Beginners, " where you'll learn the entire basics of After Effects.

Course Content

- 1- Introduction Adobe After Effects CC Overview Basics
- 2- Adobe After Effects CC Basic Lower Thirds Title
- 3- Adobe After Effects CC Professional Lower Thirds Title Style 1 Solid Layers
- 4- Adobe After Effects CC Professional Lower Thirds Title Style 2 Shape Layers

What is Animating Text Titles for Beginners?

The term "Animating Text Titles for Beginners" usually describes instructional content, such as tutorials, courses, or guides specifically created to educate novices on producing animated text titles within video editing or motion graphics software. These tutorials are commonly available for applications like Adobe After Effects, Adobe Premiere Pro or similar tools used in video editing.
