Database　Tools
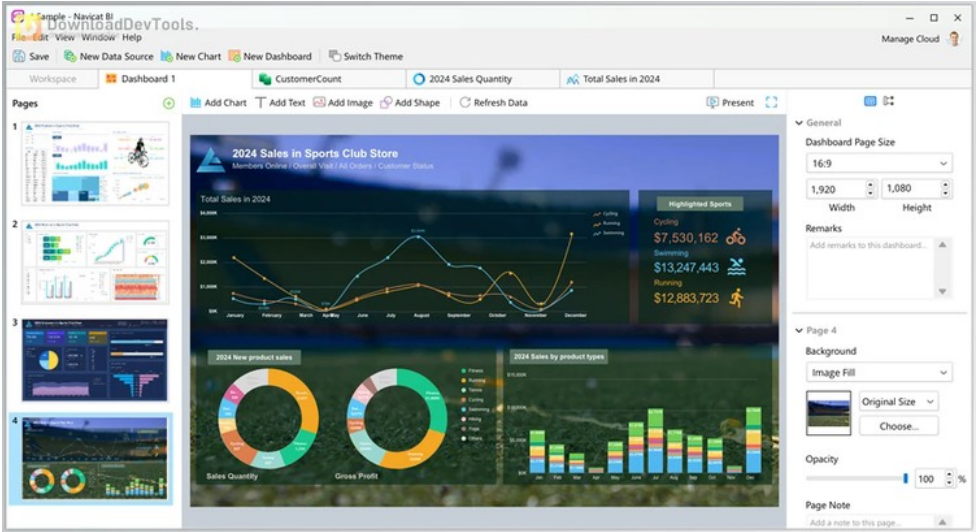

transforms your data into impactful visualizations, simplifying data analysis and making sharing insights with your team easy. Interactive dashboards allow you to collaborate more effectively and align your business strategies with data-driven intelligence. Focus mode enhances your clarity by providing a distraction-free workspace, allowing you to concentrate on your chart designs and data analysis.

Seamlessly integrate data from various sources, whether it's databases like MySQL, PostgreSQL, and MongoDB or file types such as Excel and CSV. Custom fields allow you to tailor your data to fit your specific needs, ensuring accurate representation and analysis. **Navicat BI**'s native design, optimized for specific platforms, offers a stable and enjoyable user experience for managing your databases and creating charts.

Create powerful, interactive dashboards that bring your data to life. With features like group charts, chart interactions, and control charts, you can synchronize and filter data across multiple charts for deeper insights. **Navicat BI**'s cloud integration lets you collaborate in real-time, making it easier for your team to make informed decisions together.

Key Features of **Navicat BI**:

1. Interactive dashboards
2. Data integration from databases and file types
3. Custom fields for tailored data analysis
4. Distraction-free focus mode
5. Native platform design for better user experience
6. Diverse chart types (bar, line, pie, heatmap, etc.)
7. Trend lines for data interpretation
8. Real-time collaboration with cloud synchronization
