

Unreal Engine - Railway System with IC Train (Engine version 4.27- 5.0)

2025-02-10 16:45:02 [label](#) [我要反馈](#) [下载页面](#)

Unreal Engine - Railway System with IC Train: Introducing a versatile railway construction kit that allows you to build a working railway at your level in just 5 minutes! The package includes blueprints for the Train, Track, Platform, Bridge, Tunnel, and Crossing.

Features include fast railway creation, with the track created along a spline. Everything else just snaps to the nearest track. It's optimized for minimum performance impact, and you can disable some features to optimize even further. It works perfectly with both static and dynamic lighting. Sequencer keyframed train movement support and network replication are also included.

The pack contains 8 Blueprints, 56 Meshes, 61 Materials and Material Instances, and 85 Textures (mostly 2048 or 1024, some are smaller).
