

Blender Market – Citigen v4.2.2

2025-02-10 16:44:02 [label](#) [我要反馈](#) [下载页面](#)

Citigen is a Blender extension. There is no need for HDRIs and no requirement for the rigging of animation cameras for basic drone photos like POI or Course Lock!

With just a few clicks you can design a virtually limitless range of urban environments with traffic lights, streets trees, etc. - as big as your RAMs GPUs, and CPUs can handle. The city props that come with Citigen will appear like real-world objects between 10 and 15 feet in an amount that is sufficient to create drone-like scenes, however, you can create your own building models that are detailed in the Citigen library to take close-up photos!
