Blender Market – Smart Loops Toolkit v1.1.0

2025-02-10 16:52:48　　label 我要反馈　　下载页面

Blender Market – Smart Loops Toolkit v1.1.0: A collection of tools for Blender 3.0+ that can speed up and improve your modeling process. In just a few seconds, you can increase the quality of your model (even Bolean cutouts!) without distorting the faces around, redo or undo your angles, and so on! I look forward to getting your suggestions for features and feedback. Enjoy yourself, and I hope you enjoy using the tools!

New Changes:

- Added Unsubdivide Loops Tool
- Added precision parameter to the unbevel/rebevel tools. It allows for fixing any inaccuracy issues, which sometimes
- occur when used on flat surfaces.

- Subdivide loops tool
- Fix the ngons tool
- Recalculate loop tool
- Straighten loops tool
- Straighten faces tool
- Align view tool
- Tools for Unbevel and Rebevel
- Accessing the tools
- Each tool can be accessed via the N-Panel under the Edit tab or by clicking the mouse right when in editing mode.
