I will teach you the fundamentals of starting with animation using Procreate in this course, and I will walk you through and show you various basic animation techniques that you could later apply to your artwork. I've provided a few walks and thorough exercises to help you get on the right track and move in the shortest time possible. I'll also walk you through the steps from beginning to making a fully animated sky.

When you're done with the class, you'll be able to demonstrate an understanding of the essential animation techniques, including Timing Ease In, Ease Out, and frame by frame. These techniques will give you the knowledge to add animation to any illustration straightforwardly and give you a basic understanding of how to begin animating using Procreate.

Who does this class serve?

This class is designed for newcomers who wish to start their animation journey but aren't sure how to begin. There is no prerequisite for experience, but a basic understanding of Procreate can simplify the class.

What you'll learn:

- Frame-by-Frame Animation
- How to use Timing & Spacing
- How to add Ease In and Ease Out
- How can you make use of Liquify & Opacity to give unique effects
- Making an animated sky illustration from beginning to end

What do you require:

- You'll require the iPad Pro, Apple Pencil, and Procreate to take this class.

What is The Beginner’s Start to Animating in Procreate?

Animating in Procreate is a creative and engaging process that allows you to bring your illustrations to life.

Remember that animation is an art form that takes time and practice to master. Be patient with yourself and have fun exploring the creative possibilities that Procreate offers. Additionally, there are many online tutorials and communities where you can find guidance and inspiration for your animation projects.
