1.
2.

FStorm Render for 3DS MAX v1.5.7M (Win) is a highly popular GPU renderer developed in collaboration with PinkSoft LTD. Launched in 2015, it has gained prominence among architectural 3D artists for its speed, quality, and user-friendly interface.

How to design a project in 3D?

You can use "Fstorm Render FOR 3DS MAX" to design your project.

Unlike other render engines, FStormRender relies solely on proprietary technology to generate exceptional photorealistic outcomes.

"FStorm Render for 3DS MAX" Samples:

Notable features include continuous updates to enhance GPU rendering capabilities, full integration with the 3ds Max environment, and a built-in scene converter for seamless transition from other render engines. Version 1.5.6H introduces improvements such as grid displacement enhancements, support for 3ds Max 2024, and bug fixes addressing various issues like geometry compilation crashes and broken textures.
