Vintage Bundle CreativeMarket-1327728: We are delighted to offer this growing collection, which currently comprises an original collection of vintage images sourced from 21 graphics packs. They were rescued from many old magazines, books catalogs, printed advertisements, and catalogs and then carefully digitalized, enhanced, and transformed into scalable vector images. The majority of them are detail-oriented, making them ideal for branding and logo design designs, posters, patterns as well as stationery, and anything else you can imagine. They are scalable and you can modify them according to your preferences.

The package is too big and large to fit by Creative Market, so you will receive a PDF document that contains hyperlinks on Google Drive.

Access is also free to all the old images we will publish in the future. Please ensure that you've downloaded the most current version.
