Automated WEATHER Forecast – Script and Template VH-44614632: Experience the exclusive Graphical Project/Template that revolutionizes weather forecast graphics automation in After Effects. Effortlessly set up the forecast once and then use the script daily to effortlessly update current and forecast weather data with a single click, saving valuable hours of manual work.

This comprehensive World Weather Forecast Graphics and Script package includes a range of elements:

- World Flat Map and World Countries with 240 labeled country layers in re-scalable vector format
- Realistic Earth Globe (No-plugins required)
- Forecast Graphics in standard and vertical orientations
- Weather Icons in realistic shapes and line variations
- Forecast table examples and more

The AWF Script facilitates creating and updating weather graphics for any city or location globally. Input a city name or latitude and longitude values to generate graphics for the current weather or a 5-day forecast with a 3-hour step. The script enables automatic updates of forecast data and graphics, simplifying the process for daily use.

Use this template to create broadcast graphics, world forecast reports, forecast tables for countries, regions, or continents, weather alerts, and breaking news. All graphics are fully editable, allowing seamless adaptation to existing designs or brand images. The modular design is versatile and suitable for TV, web, social media, YouTube, apps, and more.

- AWF Script for automated updates
- Current weather forecast
- 5-day/3-hour forecast
- Flat World Map and Flat World Country Map setups
- Earth Globe Map setup
