下载页面

The **Unity Asset - Seaside Docks** offers 189 modular prefabs for creating detailed docks and wooden seaside structures, emphasizing full modularity and creative freedom.

#### How to use modular prefab to create accurate piers and coastal wooden structures in your project design?

You can design your project using "Unity Asset - Seaside Docks".

It includes PBR textures, structural components, and props, with prefabs designed plank by plank for a natural look. The main demo scene, crafted in Unity, showcases the modular pieces and includes LODs where necessary. While some elements overlap with the Medieval Mega Pack, this kit provides many new, original prefabs. Features include 2048 to 4096-resolution textures and a bonus mermaid model.
