2DF VHS can be described as an After Effects project with several live-action scenes and openers that were created with authentic 90's TV and VCR. It was created to bring the nostalgia of the 80's and 90's back to the present. This is purely nostalgic. Simply drop your content and personalize the placeholders.

Make use of the effects and transitions included to help make your videos more real. **Sound FXs are included!**
