- Three actions to get three rings thicknesses
 - Fine
 - Medium
 - Coarse
- **Only 1 Click**
- **Non-destructive:** Keeps the original images unaltered
- All three actions can be performed with the same file
- Groups with well-organized layers
- Background rings with Adjustment layers to change or modify its color
- Transparent background
- It works with any size image. Minimum file size: 1200 pixels
- Uses CMYK or RGB
- Photoshop versions CS6,,CC,CC2014,CC2015,CC2017,CC2018,CC2019+

Content

- A CONCENTRIC_RINGS set with three items.
 - CONCENTRIC_RINGS_FINE
 - CONCENTRIC_RINGS_MEDIUM
 - CONCENTRIC_RINGS_COARSE
- 1 PDF Help File

Install:

Load the Concentric Rings Activities

- CONCENTRIC_RINGS.atn

Instructions

- Save the image.
- Create a top layer of masking material for the area where the rings will be placed.
 - Maintain a margin of 20% on the left/right sides of your document
 - Avoid landscape masks
- Choose the Actions Panel action you want.
- Click on the Play Action button in the bottom panel
- The action ends with a New Layer Group called as the action played

Custom

- To hide or show the Right or Left group of layers, click the layer's eye icon. This will display only half of the background
- Click the expand icon to the left of the layer thumbnail to open the Left or Right layer group.
- Double-click the layer thumbnail to open the Options Panel. To change the background rings' color, move the sliders.
- To run the next action, you can select the mask layer once again after playing an action. The Layer Panel will automatically place the result of the new action at the top.
