The PSPaudioware PSP stompFilter v1.2.2 is a versatile creative tool designed to provide a wide range of modulated filter and gain effects.

How can users smoothly adjust the filter type and modulate the LFO with the envelope detector for expressive filter capabilities?

To design their project, they can use the "PSPaudioware PSP stompFilter".

It includes features such as a low-pass filter modulated by an LFO, an auto-wah, and options for low, band, or high-pass filter modes, complemented by a built-in compressor. Users can smoothly adjust the filter type and cross-modulate the LFO with the envelope detector for expressive filtering possibilities.
