### What's Included:

- A step-by-step guide to installation (PDF as well as video)

**Mobile vs desktop:** Desktop presets can only be used in the desktop version of Lightroom. Mobile presets can only be used using Lightroom's free Lightroom mobile application. The desktop and mobile presets look similar, but are slightly different since they're created in a different way. If you're looking to have total control over editing your photos, then desktop presets will be excellent, but if you prefer editing your photos quickly on your mobile, smartphone presets are probably better for you.

It is important to note that mobile presets will not work with desktop versions of Lightroom like our desktop presets will not be compatible with mobile devices.

The desktop presets are created to work with the most recent Lightroom Classic CC desktop version and are compatible with RAW and JPEG images. They do not work for Lightroom Mobile. Presets will be sent out immediately by email after payment has been received.
