In 2022, too, more filters! UltraZap, UltraGlow, Emboss, Pin Warp, Beauty Studio, and more.

It features a robust layer-based compositing system and versatile masking tools. Optics is an excellent tool for basic editing of photos, complete image manipulation, or creating artistic graphics and assets. You can add a lighting effect with a single click or blend multiple filters and masks to create your style.

The Most Effective Lighting Effects

Explore the largest selection of lens flares made by procedural technology lighting, gobos, and particle-based effects of photographs. Why would you use footage from stock when you can create, edit, and save your libraries of presets and favorite effects?

Build and mix your library of presets and your personal favorites. Optics is a complete system. Optics is procedural to allow for creativity and control.

Trusted By Pro VFX Artists

Optics is a collection of filters and plugins frequently used in famous television and films. The best tools of the Boris FX Suite are included in Optics to produce high-quality photographs.

It includes Lens Flares, Light Rays, Ultra Zap (lightning), UltraGlow, Light Leaks, and many other items from the cult Boris FX Sapphire collection and Continuum's Beauty Studio.

Physical Camera Specifications

Whether it's historic film stock or color grading diffusion and lens effects, Optics can be the Photoshop filter that mimics the physical properties of optical filters.

Bring beauty and depth to your digital photos with diffusion filters like Mist Fog Net, Halo, etc. The New Beauty Studio filter simplifies methods of detail separation to create gentle skin Retouching!
