Aescripts FontShaper 1.0.1: Introducing FontShaper: The Ultimate Text Import Tool! FontShaper revolutionizes the way you work with fonts in Adobe applications by allowing you to use and import text without the need for installation. Access a vast library of over 780 Google Fonts (API key required) and any local fonts directly from your computer, all without installing them on your system.

How can we add font libraries in Adobe applications?

You can use "Aescripts FontShaper."

This powerful tool lets you create and import text as vector shapes seamlessly into Photoshop (SVG), After Effects (Shapes), and Illustrator (SVG), ensuring that your typography is always sharp and flexible. With FontShaper, you can master your typography without any compromises.

"Aescripts FontShaper" Samples:

- Effortless Font Access: Use over 780 Google Fonts and local fonts without installation.
- Instant Import: Import text as vector shapes directly into Photoshop, After Effects, and Illustrator.
- Flexible Saving Options: Choose custom paths or standard locations like desktops, documents, or project files for saving.
- Supported Formats: TTF, OTF, WOFF.
- Settings and Customization: Includes settings for Google API, local fonts folder, temporary folder, font style, size, fill rule, and line position.
- Compatibility: Made with CEP9, requires Adobe CC 2018+ products. For Apple Silicon machines, Photoshop must run under Rosetta Mode.
