# Aesweets – Sweet v2.3.0 + Addons (WIN, MAC)

2025-02-10 17:14:44　　label 我要反馈　　下载页面

candy for Results is a vector preset-based script That can help you construct smooth and yummy cartoons in only a couple of clicks

Select presets: Select presets from various classes and apply them Once into the present time of your own scene.

Generate: Add them into the Composition automatically with a single click. It is that easy.

Customize: Customize them as you desire. YES, they're pure vectors without Expressions, only a few important frames.

Really not at all.

Sweet's fundamental idea is to spare you time. It provides you with a huge collection of launching points. Everything you Want to include is Your creativity and expertise to find the best outcomes. Becoming preset predicated permits One to build upon what's present and fortify your chances. Now you have Way more enjoyable working and lots of free time to invest just how you like it.

To make things much better candy's Layers are color-coded by default so that you may locate them easier from the complicated Jobs.
