

CData Drivers for JDBC-ODBC Bridge v24.0.9060 (23 Oct 2024) All Platforms + License Key

2024-12-18 23:02:45 label 我要反馈 下载页面

CData Drivers for JDBC-ODBC Bridge seamlessly connects Java and J2EE applications with native ODBC drivers, enabling JDBC access from any Java application to ODBC data sources on Windows, Linux, and Mac. Whether your organization utilizes Java-based tools for reporting and analytics or develops custom Java solutions, the CData JDBC-ODBC Bridge provides a straightforward solution to connect with a variety of ODBC data sources.

This JDBC-ODBC Bridge is a 100% Pure Java JDBC driver, ensuring compatibility with Java-based BI and analytics tools such as Pentaho, Informatica, JasperSoft, and more. supports Java development environments like Eclipse, JBuilder, WebLogic, and ColdFusion and operates seamlessly across different platforms, including Windows, UNIX/Linux, and Mac. Additionally, the bridge supports both ANSI and Unicode ODBC drivers, making it versatile for diverse data source requirements. Notably, it serves as a drop-in replacement for the deprecated Oracle JDBC-ODBC Bridge, offering an efficient and modern alternative for Java applications connecting to ODBC data sources.

Key Features of CData Drivers for JDBC-ODBC Bridge :

1. Enables seamless connection between Java/J2EE applications and native ODBC drivers
2. Facilitates JDBC access from any Java application to ODBC data sources on Windows, Linux, and Mac
3. Suitable for organizations utilizing Java-based tools for reporting, analytics, or developing custom Java solutions
4. 100% Pure Java JDBC driver for broad compatibility
5. Supports Java-based BI and analytics tools like Pentaho, Informatica, JasperSoft, etc.
6. Compatible with Java development environments such as Eclipse, JBuilder, WebLogic, ColdFusion, etc.
7. Cross-platform functionality, supporting Windows, UNIX/Linux, and Mac operating systems
8. Compatibility with both ANSI and Unicode ODBC drivers for versatile data source connectivity
9. Acts as a drop-in replacement for the deprecated Oracle JDBC-ODBC Bridge
10. Provides an efficient and modern alternative for Java applications connecting to ODBC data sources.
