Maxum Rumpus Pro v10.0.10 for Win & macOS

2025-04-07 11:50:23

is a powerful yet simple solution that turns any Mac or PC into a complete file transfer server. With Rumpus Pro, you can easily send files to clients or let them upload directly to your network in a secure, well-managed environment. It supports multiple secure transfer protocols, including FTP, FTPS, WebDAV, SFTP, and a customizable web interface, making secure file sharing fast and efficient.

Security is at the heart of Rumpus Pro. You have complete control over your data since it runs on your own network instead of relying on a cloud service. Built with modern encryption standards, it ensures your information stays safe while supporting essential security protocols like HTTPS and SFTP. Additionally, **Maxum Rumpus Pro** includes a user-friendly Web File Manager, allowing anyone to upload or download files easily using a familiar web browser interface.

Maxum Rumpus Pro is designed to be accessible even for non-technical users, making file transfer server management straightforward. It provides regular updates to keep up with security and technology changes, ensuring your server stays current. Plus, with the Rumpus Tether desktop app, your organization can streamline workflows by quickly accessing and managing files on the server.

Key Features of **Maxum Rumpus Pro** :

1. Secure and Private: Rumpus Pro uses advanced encryption and runs on your network, keeping your data under your control and safe from cloud service vulnerabilities.
2. Customizable Web Interface: The web-based file manager lets users upload, download, and share files easily, with full customization options to match your brand.

所有软件资源 100%安全 已检测 无病毒 无篡改
