Cyclops is an After Effects extension that makes displaying off the null layers, movement paths, and layer-bounding containers at the back of your animation speedy and easy.

Screen recording software programs can't assure a correct seize which may additionally wreck the time you spent perfecting your animation curves. Manually taking screenshots and stitching them collectively is gradual and inclined to errors like lacking a body or shooting a body twice.

Cyclops is the sole way to create a pixel-ideal seize of your animation whilst inclusive of these more goodies.
