The crystal photo leak overlay can be described as a form of prism overlay that can give a unique look to your images. It's a large bundle overlay with different light leak collections, including the colors blue, red, and more. This bundle will help you edit the photo that you took easily. All you have to do is to put it onto your image and mix it together to create the images you desire. It can alter your photos in a magical way and change the color of your photos immediately.

These light leak overlays may be ideal for photos with dark backgrounds or ones with very low exposure. If you're experiencing poor lighting, try to mix it with the crystal light leak. It could help you overcome it. If you're struggling with a boring photo arrangement for your photographs with crystals, a touch of the color on your photograph could cause it into something more appealing. The crystal or prism overlays will definitely help to enhance your photos immediately. It is a given to take this collection together, it is well worth acquiring due to its uniqueness and authenticity. Check out the previews below the collection will cause images that are attractive and beautiful effortlessly.
