How to use text or logo for video?

You can use the movie trailer title in After Effects.

Where can I download the product?

After subscription, You can download it for free from here.

How to use

- 1) Open the "Logo" folder and composition "Logo".
Import your logo, then drag them to the compositions that we opened. Set the size to fit compositions.
- 2) Now open the "Edit Film" folder and the composition inside. Import your video into the project, and drag it into the composition
- 3) Now export the project to Premiere Pro. To do this, go to "window" and click Essential Graphics and in this panel, click Export Motion Graphics Template. Wait for about 10 minutes to convert the project into a MOGRT format. Save under the instructions, then select "Local Drive" and in Browse we choose the place of export.
- 4) Now go to Premiere Pro. Let's create a sequence.
Now install the Motion Graphics Template. To do this, go to the Graphics panel, click on the Install Motion Graphics Template, and select our "Mogrt" file.
- 5) In the panel of Essential Graphics, our template appears. If you do not have this panel, go to Windows and check this box.
Next, drag our project to the timeline panel, and in the warning panel select "Change Settings"
- 6) Now go to the Edit tab and configure the project parameters, after which you can output the project to the video format.
