**Blender Market's Procedural Building Generator 2** A Revolution in Building Creation The Procedural Building Generator 2 (PBG 2) from Blender Market introduces a groundbreaking approach to generating custom buildings within scenes.

### How to apply changes to your project using standard tools in Blender?

You can create your project from "Procedural Building Generator 2" in Blender Market.

### Where can I download the product?

After subscription, You can download it for free from here.

Utilizing Geometry Nodes, this tool allows for real-time editing, transforming the building creation process into a seamless experience. Users can easily access the Asset Browser, select presets, and apply them to objects, initiating rapid modifications using Blender's standard tools.

With PBG 2, crafting tailored buildings becomes effortless, with options for extrusion, movement, and loop cuts, enabling users to shape render-ready structures within minutes or even seconds.

This updated version offers an extensive array of building styles, facilitating mix-and-match creativity to achieve specific architectural aesthetics. Unlike its predecessor, PBG 2 simplifies usage by eliminating template imports and expanding functionality to support simulations and diverse styles across different floors. Its enhanced adaptability seamlessly integrates with meshes, ensuring overall compatibility.

The core of PBG 2 is modular, featuring nine distinct node groups that empower users to apply different styles to various floors. Experimental support for deforming meshes opens doors to advanced features like cloth simulations and armatures. PBG 2 includes a variety of building styles in its base version, with options to expand through additional packs or custom creations, enabling users to redefine architectural storytelling.
