**AeScripts TextBox 2 v1.2.6:** The **textBox** is a native Plugin that produces a perfectly sized, yet customizable contour behind your text which updates automatically and is used right to the text coating without the demand for parenting, mattes, or expressions.

**TextBox** Is Ideal for saving time working With text & contours. Layer parenting is useful but does not take into consideration matters like animated monitoring. Parenting is much more awkward if you need matting too. **TextBox** does this and much more in a convenient layer.
