**Aescripts Head to Line v1.1:** Do away with the grueling creation of animated arrows using After Effects...

mainly when dealing with multiple, especially when dealing with multiple.

"Head to Line" is quick, simple to use, and can be time-saving when creating custom Arrows!

Draw lines, then "Head to Line" makes the arrows animated... simply one Click!!

(No keyframing required)

### Introducing Head to Line :

A script Panel that allows you to make animated arrows using lines.

With a range of Arrowheads (i.e., triangle and star, circle as well as rectangle) to give you many choices.

You can change or reverse the animation direction or alter the arrowhead type and the length at any point.

It is easy to alter the size and color of Arrows and quickly change their size and color.

Select your arrowhead and the duration of the animation. Head to Line, and you will do the rest in just one click, saving you lots of time.

### What is the reason why it is that Head to Line exists?

I've spent much of my time creating animations of arrows to accompany courses-based projects.

Ultimately, I thought, "How can I automate this process and have various options to customize my arrows?" That's when Head to Line was born.

Utilizing Head to Line, I've spent numerous hours creating animated arrows on the table!

### Who is Head to Line?

The Head To Line program is designed for all After Effects users and would like to make more efficient use of animating lines and creating an arrow.

It will save many hours, particularly for designers working with online learners on projects (courses, tutorials, etc.).
